
IMTLazarus: A New Approach to Digital Safety

One platform. Every device. Safer learning for all.

Why We Exist

At **IMTLazarus**, we believe schools shouldn't have to choose between embracing technology and protecting their students.

That's why we built an ecosystem that does **more than** filter content.It supports teachers, empowers families, and keeps students safe, across any device or platform.

Because meaningful change happens when safety, awareness, and learning move together.

That's how we help schools raise **responsible digital citizens.**

What’s the Problem

More tech, less control

Schools are using more devices and platforms than ever, but digital risks are growing faster than they can keep up.

- Teachers are overwhelmed by constant distractions
- IT teams struggle to secure mixed and BYOD environments
- Families feel left out of the digital equation
- Students are exposed to risks that often go unseen

Most platforms just block content, but the real issue isn't what students see.

It’s how they use technology, and why.

Meet IMTLazarus

An all-in-one platform for secure, seamless, responsible technology use in schools.

IMT Lazarus

Our Solution

One ecosystem for safer, smarter digital learning

IMTLazarus is a **cloud-based ecosystem** that integrates educational technologies into a single environment. It helps schools manage, protect, and guide student use of technology **across all devices,** platforms, and learning contexts.

We bring together **classroom control**, **digital safety**, **behavior analysis**, and **family visibility** in one unified experience.

IMTLazarus works with the tools schools already use, including Google Workspace, Microsoft Teams, JAMF, and more.

What Sets Us Apart

- AI-powered **image analysis** for classifying activity.
- **Built-in behavior analysis** to detect risks and promote healthy habits.
- **Real-time visibility** and control for teachers, IT teams, and admins.
- Intuitive and **easy-to-use interface** for teachers and families.
- Compatible with all major ecosystems: **Google, Microsoft, Apple, Android**.

IMTLazarus is not just compatible. It's adaptable.

What Makes Us Unique

- **Imbrication technology** that layers over existing platforms to centralize control.
- **Data persistence** with long-term history for evaluation and improvement.
- **Truly device-agnostic** and works across mixed environments without compromise.
- **Workroom-based architecture** that reflects real classroom organization and group dynamics.

Built for the Whole Community

Teachers

- Real-time classroom control
- Visibility into student activity
- Fewer distractions, smoother lessons

Parents

- View into digital behavior
- Peace of mind without intrusion
- Encourages shared responsibility

IT Teams

- Cross-platform device management
- Risk alerts and deployment flexibility
- Works with or without MDM

Students

- Protected from inappropriate content
- Guided toward healthy tech habits
- Learn digital responsibility by doing

The Ecosystem

One ecosystem. Many agents. Total visibility.

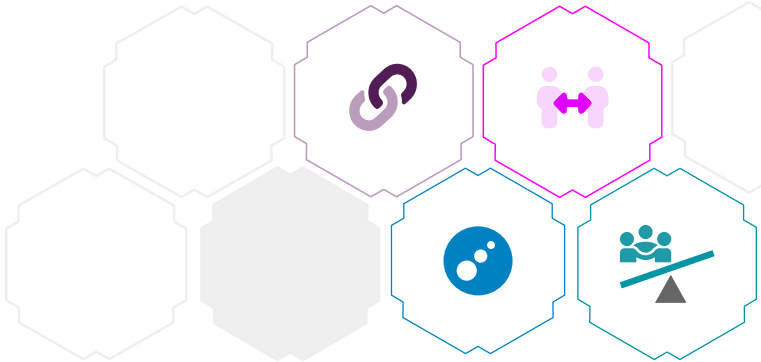
Lazarus

Our Ecosystem

Meet the agents that make it all work

IMTLazarus is not a single tool. It's a connected **ecosystem of agents** that work together to support every part of the digital learning experience, from the classroom to the home.

Each one plays a role in creating a seamless, secure, and flexible environment that adapts to how schools teach, learn, and grow.



Enrich your **Google Workspace** and **Classroom**

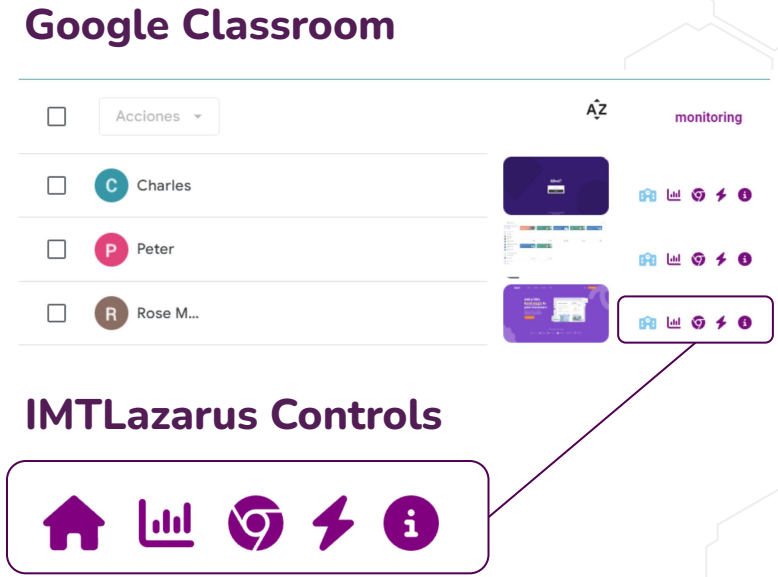
with IMTFusion

IMT Lazarus

IMTFusion

Our embedding and imbrication technology, **IMTFusion,** puts the IMTLazarus control panel and the other technologies available directly inside the platforms teachers already use.

The right support, exactly when and where it's needed.



IMT Lazarus

What if your **students' data** never left the school's control?

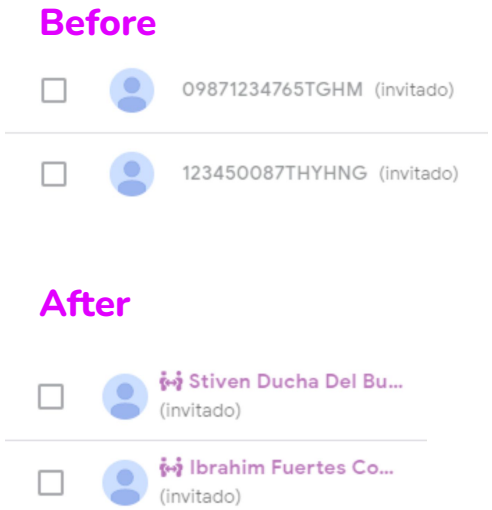
Meet

IMT Lazarus

IMTSwitch

IMTSwitch uses **pseudonymization** to translates student identities so only **school-approved users** can access them in the browser.

Evolved identity masking with or without an IdP provider.



IMT Lazarus

Protect and guide students using iPads,
Android tablets with IMTGo

IMT Lazarus

IMTGo

IMTGo is our secure browser agent for iOS and Android.

It gives schools visibility and control over student activity, **analyzes student activity** to detect risky behavior, supports **focused navigation** in class, and **prevents exposure** to harmful or inappropriate content.

IMT Lazarus

Peace of mind for you, **freedom made safe** for them with

IMTHome

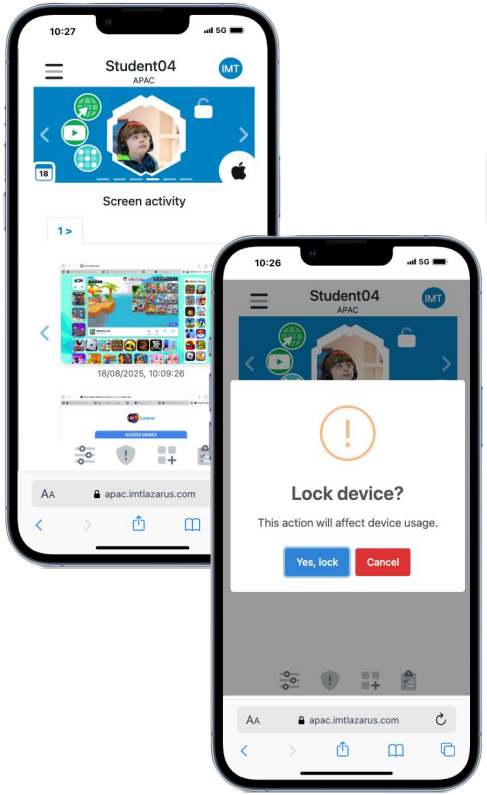
IMT Lazarus

IMTHome

IMTHome helps families feel closer, even when screens are in between.

It gives families exactly what they've been asking for: a clear, easy, and effective way to know what their children are doing online and keep them safe.

- **See** which apps, websites, and content their child is accessing
- **Set** healthy screen time limits and routines
- **Apply** filters for web and YouTube
- **Receive** alerts and screen captures when something feels off
- **Stay informed** without needing to be a tech expert



IMT Lazarus

Tech Integrations

IMTLazarus is built to work where you already are.

Why Schools Choose Us

IMT Lazarus

What they value most

- **Total compatibility:** One system that works across Google, Microsoft, Apple, and all major devices.
- **Cross-platform classroom control**: Real-time visibility and management for teachers, IT teams, and administrators.
- **Digital wellbeing at the center:** Designed to promote healthy tech use, not just block harmful content.
- **Family engagement tools:** Bringing families into the conversation with visibility and peace of mind.
- **Scalable and secure:** Works just as well for one school as it does for an entire district.
- **Backed by real support:** From onboarding to deployment, our team and resellers are ready to help.
