Un-enrollment 6

MacOS Registration and Enrollment Manual

User manual

Prerequisites

1. **The Mac must have Internet access (Wi-Fi or cable) during the enrollment process.**
2. **For Apple Configurator 2, an administrator Mac with the app installed and a USB-C/Thunderbolt cable are required.**
3. **For Apple School Manager, the device must be registered in the school's Apple Business/School Manager (direct purchase from Apple or an authorized reseller, or added manually).**
4. **Before a device can be enrolled, the device must be registered in IMTLazarus and, in its device configuration under the "IMTLazarus" section, have the "IMTLAZARUS" MDM server enabled.**

Phase I- Registration

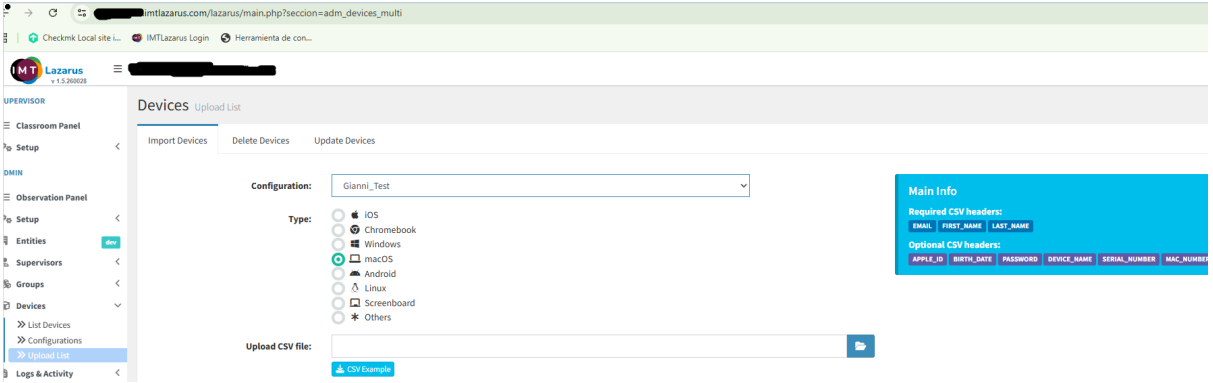

Before being able to successfully enroll devices, they must first be registered in IMTLazarus

Important! If you will be using the internal IMT Lazarus MDM instead of your own existing one, the MDM must first be activated by Support

A) Mass registration of Devices

(This can be used to mass import devices into IMT)

Enter the Console of IMT Lazarus , select Devices and then Upload list, then you will see the import devices tab

Make sure the profile selected above is the one with the MDM you have selected,

User manual

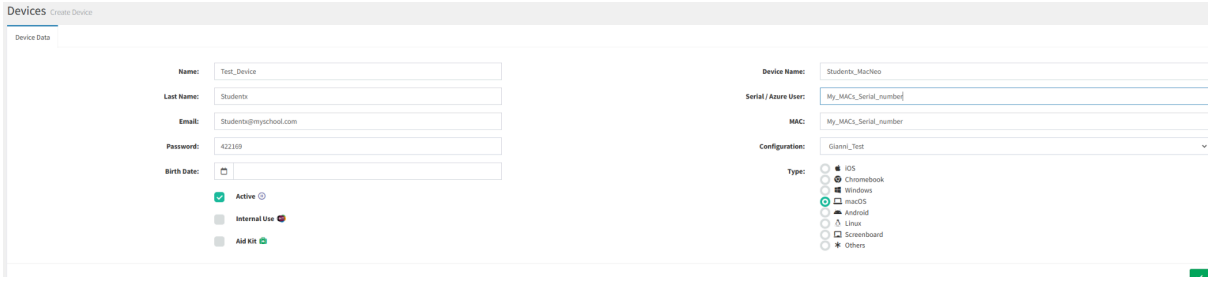

B) Manual import of Devices

(Use If you only have a few devices to register.)

Enter the Console of IMT Lazarus , select Devices and then List devices, then select the green button to create a new device

Please fill in all required data and mark the device as macOS and Active.

Then hit the small green checkmark to **save** the new mac

Once all your macs are registered, you can move to Phase 2 and enroll the MacOS devices.

Phase II - Device Enrolment

Option 1 — Apple Configurator 2

Recommended for bulk enrollment of several devices at once, connected by cable to an administrator Mac.

MacOS Registration and Enrollment Manual

User manual

Note: besides the Mac with Apple Configurator 2, the device can also be supervised using an iPhone with the "Apple Configurator" app, available for free on the App Store.

MDM Server (enrollment URL):

MDM Server URL	**https://XXXXXX.imtlazarus.com/enroll.php**

Steps:

1. **Connect the Mac to the administrator computer via cable.**
2. **Open Apple Configurator 2 and select the device from the list.**
3. **Go to Actions → Prepare.**
4. **In the assistant, choose "Manual Configuration" and, when prompted for the MDM server, enter the URL above.**
5. **Confirm and wait for the device to be prepared and automatically enrolled in IMTLazarus.**
6. **Restart the computer to complete the process.**

Option 2 — Apple School Manager (DEP)

Recommended for "out of the box" automatic enrollment: the device enrolls itself the first time it is powered on, or after a wipe, with no manual user intervention.

General steps:

1. Log in to Apple School Manager (school.apple.com) with an administrator account.
2. Under Settings → MDM Servers, confirm that IMTLazarus is registered as the school's MDM server.
3. Under Devices, locate the Mac (by serial number) and assign it to the IMTLazarus MDM server.
4. In IMTLazarus, go to Settings → IMTLazarus MDM → DEP Profiles and sync so the device shows up as registered.
5. Power on the Mac (or factory-reset it). Setup Assistant will detect the DEP assignment automatically.
6. Follow the on-screen steps; the device will enroll and apply the IMTLazarus configuration before reaching the desktop.
7. Restart the computer to complete the process.

User manual

Option 3 — Manual enrollment

Recommended for individual devices or one-off tests, without needing Apple Configurator or DEP.

Enrollment URL:

URL	**https://XXXXXX.imtlazarus.com/enroll.php**

Steps:

1. **On the Mac, open Safari and go to the URL above.**
2. **Download the management profile.**
3. **Open System Settings → Profiles.**
4. **Select the downloaded profile and click Install. Confirm again when prompted.**
5. **Download and install the IMTLazarus package (.pkg).**
6. **Install Google Chrome.**
7. **Restart the computer to complete the process.**
8. **Once restarted, the device is enrolled and managed by IMTLazarus.**

Un-enrollment

To remove a Mac from IMTLazarus management:

1. **Open System Settings → Profiles.**
2. **Select the IMTLazarus management profile.**
3. **Click Remove Profile and confirm.**

Note: if the device was enrolled via Apple School Manager (supervised), the profile may not be removable by the user without prior authorization from IMTLazarus.
